Background Screening made

- Simple
- Flexible
- Powerful
- At your fingertips

OUR EXPERTISE

With cutting-edge background check software and an easy-to-use mobile platform, we help you get more efficient, cost-effective results.

OUR STRATEGY

Our technology expedites the hiring processes by allowing applicants to complete and check the status of their background screening on their phones.

Our sophisticated and automated background screening platform reduces data entry, manages documents, and integrates providers for a better screening process.

An I-9 is required for every single employee, but there's no reason why I-9s or E-Verify checks should be cumbersome.

We help you complete I-9 and E-Verify processing quickly so you can focus on what matters most: hiring exceptional candidates.

Let us take the hassle out of your employment eligibility checks with our online I-9 Anywhere and E-Verify processing tools.

Social Security number and name mismatching is far more problematic (and expensive) post-hire. That's why we offer consent-based social security number verification (CBSV) as a pre-hire best practice option.

With the consent of the SSN holder, CBSV can verify whether their name, date of birth, and SSN directly match the official governmental source records of the Social Security Administration Master File and Death Index.

Consent-based social security number verification (CBSV)

An employee's criminal history isn't guaranteed to be the same post-hire as it was during the initial background screening.

It's important to conduct post-hire background checks on current employees to help mitigate violence, fraud, and theft in the workplace.

Continuous Monitoring ensures every hire remains not just a good match for your clients but a safe one, too.

Give applicants the keys, and they'll drive the entire background screening process.

Our fully integrated Applicant portal reaches applicants where they live: on their phones.

Designed with two things in mind for hiring managers and applicants: speed and transparency, our advanced applicant portal allows individuals to complete their background checks on their computers or cell phones, streamlining the entire screening process from start to finish.

Create reports on orders that have been adjudicated via dropdown adjudication lists or "Subject-Level Adjudication".

You can also override the report disposition by going to the report itself and making changes in place.

Restrict who can set the report disposition with "Yes", "No", or "When not adjudicated".
